If you suspect you or a patient has COVID-19.

The CDC instructs providers to consult with local or state health departments to determine whether patients meet [criteria for a Persons Under Investigation \(PUI\)](#). Providers should immediately notify infection control personnel at their facility if they suspect COVID-19 in a patient. Please notify your state or local health department if a patient is classified as a PUI for COVID-19.

Providers should report recognized exposures, regularly monitor themselves for fever and symptoms of respiratory infection, and not report to work when ill. Providers in low-, medium-, or high-risk exposure categories who develop signs or symptoms compatible with COVID-19 are strongly encouraged to contact their established point of contact (public health authorities or their facility's occupational health program) for medical evaluation prior to returning to work.
